Precipitation probability							
00%	00%	10%	70%	60%	30%	20%	30%

Forecast for Tuesday 23 Feb 2021

Weather: Clear spells with patchy mist or fog in eastern valleys in early hours, but these will disperse overnight as cloud increases and winds strengthen. Bright, but cloudy and windy start Tuesday and cloud will thicken to bring patchy rain or drizzle mid-morning. Most of the rain will die out in the afternoon, but staying cloudy and there will likely still be some rain or drizzle onto southern and western slopes at times through the day

Chance of cloud free mountain/hill tops above 600m: 90% overnight and early Tuesday, but 30% from mid-morning, though chance reducing further in west by the afternoon

Visibility: Poor or very poor in mist and fog in early hours, otherwise good, but broken cloud down to 500m by mid-morning, will see visibility become poor at height and moderate at times in rain beneath the cloud, with more extensive cloud developing in west, down to 400m at times

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Very windy at height with some chill effect, but generally mild. Strength of wind will bring risk of being blown over.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Mon 22 Feb 2021	7.6mm	14mm	67.4mm

Forecast for Wednesday 24 Feb 2021

Weather: Cloudy, mild and windy with a little rain at times, especially in west but a longer spell of rain in late afternoon, before turning to showers in evening

Maximum wind: South to southwest 30 gust 40mph, but 45 gust 60mph over the tops, decreasing 20-25 gust 35mph in evening and turning west to southwest

Chance of cloud free mountain/hill tops above 600m: 30 or 40% in east, but 10% in west much of the day

Visibility: Broken cloud above 500 or 600m in east, but extensive down to 500m, sometimes 400m in west, with poor visibility at height, though generally moderate to good beneath cloud

Temperature: **Valleys:** Plus 8C rising to 11C falling to plus 7C later
At 600m: Plus 8C falling to plus 5C later
Freezing level: Above the summits
